PROFESSIONAL EXPERIENCE

Site Reliability Engineer (SRE)

OpsWerks 2024.01 - Present

Incident Management & Root Cause Analysis

- Led the resolution of 30+ high-impact production incidents across critical microservices, administering Kubernetes clusters and utilizing Prometheus metrics and Splunk logs to conduct detailed postmortems, root cause analyses, and implementing fixes to prevent recurrence; orchestrated cross-functional incident response efforts that proactively mitigated risks, minimized downtime, and sustained 99.99% service availability to meet strict SLIs, SLOs, and SLAs.

Observability & Proactive Monitoring

- Configured and maintained alerting rules and dashboards in Splunk and Grafana, surfacing real-time system and application health metrics for technical teams and business stakeholders while ensuring compliance with regulatory standards.
- Applied z-test statistical analysis to establish data-driven alert thresholds, reducing false positives and ensuring alerts triggered only at statistically significant deviations from baseline behavior.

Automation tools, Collaboration & Continuous improvement

- Led the development of an incident response application that streamlined automated incident notifications, ticketing, and tagging, contributing to team-wide MTTA and MTTR improvement to 99.8%; developed and administered pipeline workflow scripts supporting production changes in CI/CD pipelines to reduce operational friction.
- Partnered with cross-functional teams to continuously maintain and refine operational runbooks, ensuring accuracy and alignment with evolving infrastructure, tools, and processes to support effective incident response and team-wide knowledge sharing.

Reliability Engineering Support & Deployments

- Executed zero-downtime deployments for microservices including hotfixes and version upgrades using controlled rollout strategies such as canary and blue-green deployments; diagnosed and resolved deployment failures to ensure high availability and system stability in adherence to SLIs, SLOs, and SLAs.

Site Reliability Engineer Intern

OpsWerks 2023.10 - 2024.01

Technical Internship Experience

- Gained foundational knowledge in Linux system administration, networking, cloud technologies, and infrastructure as code principles, with hands-on exposure to CI/CD pipeline automation, container orchestration, troubleshooting, cross-functional collaboration, and SRE concepts including observability, monitoring, alerting, incident response, and reliability engineering through guided learning and practical application.

Case Study & Capstone

- Designed and developed a Flask-based application integrating structured logging for Splunk ingestion, Prometheus metrics collection, and threshold-based alerting; deployed and managed the application on a Kubernetes cluster hosted on Linode and Argo CD for automated CI/CD workflows; collaborated with team members across planning, development, and troubleshooting phases while contributing to technical documentation including setup guides, deployment steps, and system architecture.

TECHNICAL SKILLS

Scripting & Code:	Python, Bash scripting, Typescript, Lua, Cue and Go
Automation Tools:	Shell scripting, Python automation, PagerDuty API integration, Workflows, Pipeline CI
Cloud Platforms:	AWS (EKS, EC2, VPC, IAM, S3)
IaC Tools:	Terraform, Helm, GitHub Actions, GitLab CI/CD, ArgoCD, Atlantis, Pulumi, Ansible, Jenkins
Containers & Orchestration:	Docker, Kubernetes (CKA Certified)
Monitoring & Logs:	Prometheus, Grafana, Splunk, Datadog, PagerDuty, CloudWatch
OS Platforms:	Linux (primary), Unix; Windows environments
Databases & Middleware:	Postgres, JDBC, Oracle, Kafka MSK
Tools:	Jira, Confluence, GitHub, Hugo (Runbook Centralization), PagerDuty
Soft Skills:	Critical Thinking, Documentation, Cross-Team Collaboration, Incident Ownership, Creativity, Self-Driven

CERTIFICATION

CKA: Certified Kubernetes Administrator

Issued by Linux Foundation
Certificate ID Number LF-ouy4umqjb1

Education:

Bachelor of Science in Mechanical Engineering

Technological University of the Philippines Visayas
